

ADHD Study for Adults Who Qualify

Are you someone who:

- ***Finds it Difficult to Concentrate?***
- ***Leaves Tasks Unfinished?***
- ***Often Interrupts or Talks Too Much?***
- ***Struggles with Impulsivity?***

Find Answers.

Sharon Wigal, Ph.D. and researchers at AVIDA are seeking adults over the age of 18 to participate in a study examining the effects of an investigational medication for ADHD symptoms.

Volunteers who qualify will receive:

- Study-related ADHD evaluation and investigational medication at no cost
